LOGO EXPLANATION

GK

Green Color for "**GK Electrician**"
Letters:

- Represents **Earth Safety**.
- Green is universally associated with grounding wires, which are essential for electrical safety to prevent shocks and ensure stability.

Black Color for Neutral

- Symbolizes the **neutral wire** in electrical systems.
- Neutral wires provide the return path for the current and are critical for completing the circuit.

Red Color for R-Phase:

- Indicates the Red Phase (R) in a three-phase electrical system.
- Red is typically used to identify one of the live or active phases.

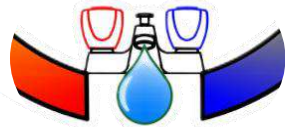

Yellow Color for Y-Phase:

- Denotes the **Yellow Phase (Y)** in a three-phase system.
- This phase plays a role in balancing the power load across the system.

Blue Color for B-Phase:

- Represents the **Blue Phase (B)** in a three-phase system.
- The blue wire helps complete the three-phase setup for efficient power distribution.

Lift Red Color for
HOT Water

Right Blue Color for
Normal Water

Plumbing Wall Mixer in the Logo

- Visual Placement:** Positioned at the bottom to complement the primary electrical focus at the top, subtly highlighting plumbing as an additional service.
- Representation:** The wall mixer symbolizes **plumbing expertise**, reflecting a holistic approach to home and commercial solutions, including both electrical and plumbing needs.
- Purpose:** Demonstrates that GK Electrician™ is not limited to electrical work but also caters to essential plumbing tasks, offering a one-stop solution for customers.

GK ElectricianTM is a trusted trademark representing professional electrical and plumbing services. It signifies reliability, quality, and comprehensive solutions, ensuring customer trust and service excellence.
